

LASER HAIR REMOVAL OVERVIEW

LASER HAIR REMOVAL OVERVIEW

Patients of all skin tones may be treated safely by our GentleMAX Pro™ system.

Hair with pigment (black and brown) responds best. White and gray hair will most likely not respond, while blonde and red may see minimal results.

Most areas of the body can be treated except the lower eyebrow.

Does it hurt? Most patients find the treatment tolerable. Sensation can be described as a snap of a rubber band.

Downtime: None.

Lasers are operated by trained, licensed Cosmetic Therapists or physicians at The Laser Loft.

BEFORE TREATMENT

No tanning.

Shave or clip hair in the area only.

No waxing, tweezing, or threading the area being treated.

Shaving the area before treatment delivers best results, although minimal stubble is fine.

Avoid bleaching or self tanners 2 weeks prior to treatment.

POST TREATMENT

Mild redness and swelling can last up to 2 hours.

Keep the treated area tan free.

Within 1-2 weeks after your treatment, the dead hair will begin to shed out and may appear as growth. Shave, clip, or exfoliate the area to remove dead hair.

SCHEDULE

Average treatments needed 6-8. This may vary by person.

Second treatment at 4 weeks. 6-8 week treatments thereafter.

COST

Treatments are affordable.

Offer pay as you go or get the best price with one of our packages.

Pricing is based on the area being treated.

Detailed pricing will be provided during your FREE consultation.
